

SESTEK

CONSTRUCTION

Our Difference is our Structures

About us

"Sestek Construction" was founded after 35 years of experience in the construction of residential and commercial buildings around the world with the latest technology, to provide "premium service around the world" through consulting and working as a contractor to do turn-key projects. Sestek Construction believes that adding value engineering into the projects using different formwork systems and technology reduces the cost of building and increases the quality and efficiency. Our company has been busy since day one and continues to provide the utmost in client satisfaction through our quality of work and by incorporating value engineering into their projects.

Having started its business in 2020 with the principle of "completion and delivery of works in a correctly, completely and timely manner, without compromising on quality". Sestek Construction has put its signature under many prestigious projects in several regions of Guinea Republic, Cote D'Ivoire and Sierra Leone.

In order to achieve this ultimate goal in every project, we utilize our professional and experienced staff, strong management, advanced technology systems and our commitment to success. Sestek Construction also remains dedicated to retaining its reputation as a high quality and reliable company in the future.
